

Supportive images

Generate illustrations for a text to make it easier to understand

1

Work in pairs. Read the text you are going to work with. Underline all the words and expressions that you understand, find important, and believe add meaning to the text.

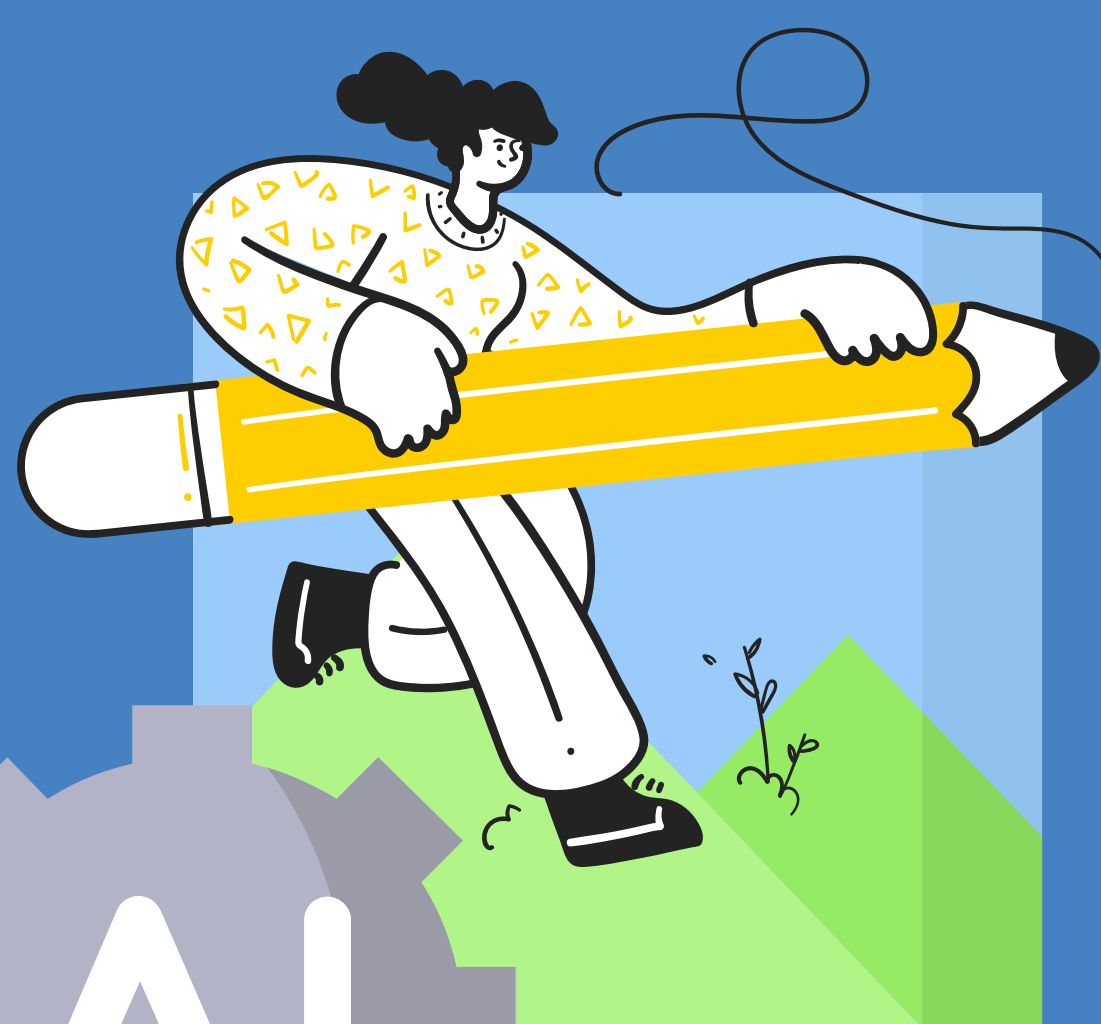

2

Talk about how you could divide the text into paragraphs. If necessary, use AI for parts which are difficult to understand.

3

With AI, now create an illustration for each paragraph. Select the short phrases, expressions and words from the text you want to use to prompt in order to create images that illustrate the paragraphs. Try several times to get different suggestions.

4

Create a document with the images, and write a caption for each illustration. Exchange the document with a pair who has another text.

5

Look at the images and captions and talk together about what the text could be about.

Afterwards, read the text that goes with the images. How did the pictures help your understanding?

6

Give and receive feedback from the group you exchanged documents with.

FOCUS ON LANGUAGE

- RECOGNISE WORDS AND PHRASES IN AN UNKNOWN TEXT
- SELECT KEY WORDS AND EXPRESSIONS
- GAIN AN UNDERSTANDING OF THE IMPORTANCE OF IMAGES FOR TEXT READING

FOCUS ON AI

- PROMPT, ASSESS AND RE-PROMPT WITH SELECTED PHRASES, EXPRESSIONS AND WORDS TO GET ILLUSTRATIONS FOR A TEXT
